### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 12 August 2004.
- 2a) ☒ This action is FINAL. 2b) ☐ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanis (5387153).

Tanis discloses:

An extension for a helical flight extending around a front inlet end of a rotor of a threshing system of an agricultural combine, the rotor being rotatable in a predetermined rotational direction about a rotational axis therethrough and the flight including a leading edge extending radially outwardly from the front inlet end of the rotor and a rearwardly facing helical crop flow surface extending rearwardly from the leading edge at a first predetermined angle of attack relative to a plane perpendicular to the rotational axis, for conveying crop materials from adjacent the inlet end of the rotor radially outwardly and rearwardly when the rotor is rotated, the extension comprising:

an elongate blade shape member removably mountable in radially outwardly extending relation along the radially outwardly extending leading edge of the flight, the blade shape member being disposed so as to be located forwardly of the leading edge of the flight with respect to the predetermined rotational direction along at least a

Art Unit: 3671

substantial portion of a radial extent thereof when mounted thereon the blade shape member having a leading edge having a curved swept back shape, and a rearwardly facing crop flow surface oriented at a second predetermined angle of attack less than the first predetermined angle of attack, such that when the rotor is rotated in the predetermined direction the member will accelerate crop material that comes into contact with the leading edge thereof radially outwardly and rearwardly onto the flight and generate a rearwardly directed air flow (as shown in fig 3, ref 56 shows a blade shape extension to a flight at the front inlet section radially outwardly & forwardly of a leading edge of the flights as claimed)

an elongate blade shape member  
removably mountable in radially  
outwardly extending relation along the  
radially outwardly extending leading  
edge of the flight

3. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanis (5413531).

Similarly to the above Tanis prior art, Tanis ('531) discloses the claimed invention: as shown in fig 3, ref 32, a blade shape extension to a flight at the front inlet section radially outwardly & forwardly of a leading edge of the flights as claimed.

### **Response to Arguments**

4. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **\*THIS ACTION IS MADE FINAL\***. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
